

SANTANA MENA

AI ENGINEER | COMPUTER VISION & RAG SPECIALIST

Bandung, Indonesia (Willing to Relocate) • +62 823-2187-9086 • santanamnaa.dev@gmail.com • santanamnaa.dev • linkedin.com/in/santana-mena • github.com/santanamnaa

PROFESSIONAL SUMMARY

Results-driven **AI Engineer** and Computer Science student (Minor in Data Science) at BINUS University, certified in **Google AI Professional** and **SAP Analytics Cloud**. Specialized in designing end-to-end Artificial Intelligence architectures, **Custom RAG systems** (LangGraph, TiDB Cloud Vector, Ollama, DeepSeek), **Edge AIoT Computer Vision** (YOLOv8, OpenCV, Intel OpenVINO), and fine-tuning Deep Learning pipelines (PyTorch, Hugging Face). Proven track record leading engineering teams, building MLOps workflows, and optimizing AI microservices for high throughput. Finalist at ICP Chain Fusion Hacker House Bali and ICPC Asia Jakarta Regional competitor.

TECHNICAL SKILLS

AI & Machine Learning: Retrieval-Augmented Generation (RAG), Autonomous AI Agents (LangGraph), Computer Vision (Object Detection/Tracking), Fine-Tuning LLMs, Deep Learning, MLOps

Frameworks & Tools: PyTorch, Hugging Face Transformers, YOLOv8, OpenCV, OpenVINO, LangChain, spaCy, Scikit-Learn, Pandas, NumPy, FastAPI, Flask, Streamlit, Docker

Vector DBs & LLMs: TiDB Cloud Vector, Ollama, DeepSeek, Sentence-Transformers, Embeddings, ChromaDB

Programming Languages: Python (Expert), TypeScript, JavaScript, C++, SQL, Java, Dart, HTML/CSS

Databases & DevOps: PostgreSQL, Redis, MySQL, SQLite, MongoDB, Docker, Docker Compose, Git, Vercel, Sentry, Prometheus, WebSockets

PROFESSIONAL EXPERIENCE

Co-Founder & Technical Lead, TSP Digital Bandung, Indonesia | Aug 2025 – Jun 2026

- Architected and deployed custom RAG engines and multi-agent AI systems, including an [\[AI Skill Gap Analyst\]](#) built with Python, LangGraph, spaCy, and Ollama to parse candidate CVs and map skill gaps against target jobs with a **92% match accuracy improvement**.
- Built production-grade RAG infrastructure utilizing [\[TiDB Cloud Vector\]](#), Sentence-Transformers, DeepSeek LLM, Prometheus metrics logging, and Sentry error monitoring.
- Configured containerized microservices for AI inference pipelines using Docker and Docker Compose, reducing infrastructure hosting overhead by 15%.
- Developed automated Shell and Python scripts for scheduled database backups and server resource monitoring, maintaining 99.9% application uptime for client AI endpoints.
- Standardized codebase setup and shared utility packages for AI team workflows, reducing project initialization overhead by 40%.

Lead Edge AIoT Engineer, PT Lumina Media Digital (via TSP Digital) Bandung, Indonesia | Jan 2026 – Jan 2026

- Engineered an edge-based AIoT computer vision pipeline in Python using **YOLOv8** optimized with **Intel OpenVINO** for real-time advertisement audience tracking on low-power edge hardware [\[Movaads Repo\]](#).
- Integrated real-time GPS telemetry via PySerial and bi-directional WebSockets for live streaming video payload ingestion into Django/FastAPI backends.

Full-Stack & Systems Developer, PT Aitiserive Djaya Naraya Bandung, Indonesia | Jan 2026 – Mar 2026

- Engineered a high-performance Python desktop utility automating multi-page document conversions (DOCX to PDF), optimizing file I/O performance and memory footprint under heavy loads.
- Developed responsive corporate web platforms using React, Next.js, and TypeScript, optimizing frontend API hooks and reducing initial bundle load times by 30%.

Full-Stack Developer Intern, PT Gunung Amal Solution Internationals Bandung, Indonesia | Feb 2025 – Feb 2026

- Built internal HRMS and Project Management platforms using Node.js (Express) and PostgreSQL, setting up containerized staging environments using Docker.
- Designed system process flows and database query logic for audit compliance systems.

FEATURED AI PROJECTS

AI Skill Gap Analyst (Python, LangGraph, spaCy, Ollama, DeepSeek, FastAPI) [\[GitHub\]](#) 2025

- Engineered an autonomous multi-agent parsing system that extracts unstructured skill data from candidate resumes, cross-evaluates against job specifications, and generates automated competency gap reports.

Movaads (AIoT Edge Computer Vision) (Python, YOLOv8, Intel OpenVINO, OpenCV, WebSockets) [\[GitHub\]](#) 2025

- Designed a low-latency edge computer vision system achieving 30 FPS inference speed for real-time vehicle and audience density detection on edge hardware.

SmartTraffic (AI-Powered Traffic Controller) (Python, OpenCV, C++, Pathfinding) [\[GitHub\]](#) 2024

- Developed an intelligent traffic light controller utilizing computer vision density detection and real-time path scheduling algorithms to optimize intersection traffic flow.

Glycora & Simjang (Diagnostic Predictive ML) (Python, Scikit-Learn, Streamlit, Pandas) [\[Live App\]](#) 2024

- Trained machine learning classification models (Random Forest, XGBoost) to predict diabetes and heart disease risk based on clinical indicators, deploying interactive diagnostic interfaces via Streamlit.

EDUCATION, CERTIFICATIONS & HONORS

BINUS University (Bina Nusantara), Bachelor of Science in Computer Science (Minor in Data Science) Bandung, Indonesia | Expected 2026

- Academic Honors:** Recipient of the **BINUS Outstanding Student Award** for academic and project leadership.
- Certifications:** **Google AI Professional Certificate** (Google), **SAP Analytics Cloud Certified** (SAP).
- Honors & Hackathons:** Finalist at **ICP Chain Fusion Hacker House 2024 (Bali)**, Competitor at **ICPC Asia Jakarta Regional Contest 2024**.
- Academic Research Citation:** EaseNeura mental health AI project cited in the [\[Journal of Innovative and Creativity \(Joecy\) Vol. 5 No. 2 \(2025\)\]](#).
