

SANTANA MENA

DATA ANALYST | SQL, DATA CLEANSING & BI ANALYTICS SPECIALIST

Bandung, Indonesia (Willing to Relocate) • +62 823-2187-9086 • santanamnaa.dev@gmail.com • santanamnaa.dev • linkedin.com/in/santana-mena • github.com/santanamnaa

PROFESSIONAL SUMMARY

Quantitative and detail-oriented **Data Analyst** and Computer Science student (Minor in Data Science) at BINUS University, certified in **SAP Analytics Cloud** and **Google AI Professional**. Specialized in Exploratory Data Analysis (EDA), data cleansing, statistical modeling, relational database querying (PostgreSQL, MySQL, SQL JOINS, CTEs, aggregation), and interactive dashboard visualization (Streamlit, Pandas, Matplotlib, Seaborn). Skilled in extracting actionable business insights from complex raw data, optimizing database performance, and translating telemetry into strategic recommendations. Recipient of BINUS Outstanding Student Award and published researcher.

TECHNICAL & ANALYTICAL SKILLS

Data Analysis & Stats:	Exploratory Data Analysis (EDA), Data Cleansing & Preprocessing, Descriptive & Inferential Statistics, Hypothesis Testing, Predictive Modeling
BI & Visualization:	SAP Analytics Cloud Certified, Interactive Dashboards (Streamlit), Matplotlib, Seaborn, Plotly, Executive Data Reporting
SQL & Databases:	SQL (Complex Queries, JOINS, CTEs, Aggregations, Window Functions), PostgreSQL, MySQL, Redis, TiDB Cloud Vector, SQLite
Programming & Stack:	Python (Pandas, NumPy, Scikit-Learn, SciPy, spaCy), Jupyter Notebooks, R, TypeScript, JavaScript, HTML/CSS
DevOps & Analytics:	Docker, Git, Vercel Analytics, Prometheus Metrics, Sentry Error Tracking, Excel/Spreadsheets (Pivot Tables)

PROFESSIONAL EXPERIENCE

Co-Founder & Data Analytics Lead, TSP Digital	Bandung, Indonesia Aug 2025 – Jun 2026
- Designed automated data extraction and analytics pipelines for digital client products, building an [AI Skill Gap Analyst] system that parsed candidate resume data and calculated competency match metrics, raising evaluation accuracy by 92%. - Engineered relational PostgreSQL database schemas and automated Python scripts for scheduled data backups and resource telemetry monitoring, ensuring 99.9% database availability. - Implemented application performance monitoring and log tracking using Prometheus metrics and Sentry across commercial web applications. - Optimized database queries and query execution plans, reducing server database latency by 15%.	
Data Telemetry Engineer, PT Lumina Media Digital (via TSP Digital)	Bandung, Indonesia Jan 2026 – Jan 2026
Engineered real-time data ingestion pipelines capturing advertisement audience impressions and vehicle telemetry on edge devices via WebSockets into PostgreSQL database clusters.	
Data Systems & Full-Stack Intern, PT Gunung Amal Solution Internationals	Bandung, Indonesia Feb 2025 – Feb 2026
- Designed analytical database query logic and auditing tables for an enterprise Audit Trail Management System, enforcing data integrity and compliance logging. - Modeled database relations and structured analytical reporting tables in PostgreSQL for company HRMS and project management tracking systems.	
Full-Stack & Systems Developer, PT Aitiserve Djaya Naraya	Bandung, Indonesia Jan 2026 – Mar 2026
Analyzed web application bundle load telemetry and Next.js API hooks, executing data-driven optimizations that achieved a 30% reduction in initial page load times.	

FEATURED DATA ANALYTICS PROJECTS

FIFA 21 Player Data Cleansing & Performance Analysis (Python, Pandas, NumPy, EDA) [GitHub]	2024
Executed comprehensive data cleansing and preprocessing on 18,000+ FIFA 21 player records, handling missing values, standardizing currency and physical units, and conducting EDA to identify key feature correlations driving player market valuation.	
Simjang (Heart Disease Analytics & Streamlit Dashboard) (Python, Streamlit, Scikit-Learn) [Live App]	2024
Built an interactive web analytics dashboard and predictive classification model (Random Forest, Logistic Regression) analyzing patient clinical indicators to detect early heart disease risk factors.	
Glycora (Diagnostic Diabetes Risk Modeling) (Python, Jupyter Notebook, Cython) [GitHub]	2024
Developed quantitative predictive models to evaluate demographic, physiological, and clinical blood data for early diabetes risk assessment.	
Pangkalan Data Taman Kehati (Biodiversity Metrics System) (PostgreSQL, Redis, FastAPI) [Live System]	2025
Structured relational database tables and Redis caching layers for national biodiversity metric tracking under the Ministry of Environment.	

EDUCATION, CERTIFICATIONS & ACHIEVEMENTS

BINUS University (Bina Nusantara), Bachelor of Science in Computer Science (Minor in Data Science)	Bandung, Indonesia Expected 2026
Academic Honors: Recipient of the BINUS Outstanding Student Award. Professional Certifications: SAP Analytics Cloud Certified (SAP), Google AI Professional Certificate (Google). Honors & Competitions: Finalist at ICP Chain Fusion Hacker House 2024 (Bali), Competitor at ICPC Asia Jakarta Regional Contest 2024. Academic Research Citation: EaseNeura mental health project cited in the Journal of Innovative and Creativity (Joecy) Vol. 5 No. 2 (2025).
